Sub Category

Subject Overall Name Space Design

Description of Problem or Suggestion:

Need an overall name space design to show integration of all naming services, including CDS and IOS. XDS was used in Rel A to provide an evolution path to x.500 naming service. The use of XDS is tedious and should be reconsidered since there are no plans to use it to get to x.500.

Originator's Recommendation

Please provide White Paper.

IDG agrees with the reviewer's comments. IDG will provide a white paper describing the overall Name Space design. The paper will specifically address the reviewer's comments. IDG will make the paper available to Mike Moore of ESDIS for review prior to publication. The due date is August 30 1996. The white paper will be published on the EDHS.
